C

Supreme Court of Arkansas.
In re COURT AUTOMATION.

Nov. 19, 1990.

*925 PER CURIAM.

In recent years, our judicial system has made great use of modern equipment, but our technical systems are incomplete and incompatible with other systems utilized in the courts and state government. Obviously, uniform and effective automation of the courts of this state will increase the cost effectiveness and the efficiency of our courts, as well as improve the quality of justice available to our citizens.

It is our intention, ultimately, to develop a comprehensive plan that would provide compatible equipment throughout the judicial system. To this end, we appoint the following members to an ad hoc Arkansas Supreme Court **Committee on Automation**.

Judge David Bogard Senator David Malone Chancellor Bentley Story Municipal Judge Terry Lynn Robert L. Brown, Attorney John Stewart, Administrative Office of the Courts, Reporter

Their charge is to fully study all issues relating to the automation of the courts and to make recommendations for a master plan of automation.
